# Fertilizer Derivatives End of Day Report

NOLA FUTURES & SWAPS

## <u>UREA</u>

Odd day in NOLA UREA, at first it seemed like we were going to see futures trade below \$700 with sell pressure mounting in the physical market (\$685 traded for a November barge and \$700 traded for a February barge), but then in the afternoon selling pressure dissipated and bids were seen higher than last done at \$703 (\$700 traded twice earlier in the day for the DEC contract). It was mostly quiet day, but we expect we might see a little bit of a pop here going into the end of the week.

## UAN

NOLA UAN futures were a touch softer today after it was annouced that CF has come out with a new offer price on UAN FOB NOLA at \$535 which is \$35 up from where offers were at previously. UAN futures acted in a funny way, we saw JAN and FEB trade down a bit to \$547 and \$550 respectively after seeing value above \$550 before the new offers were released.

## **INTERNATIONAL FUTURES**

The intl paper market largely tracked sideways today on limited activity; although we still see the market as offer heavy, suggesting paper should converge lower to physical. Egypt urea paper saw some action – 860 trading for Nov+Dec as a package in 500mt/mo otc. The level was above where we saw value, which was to be expected given the odd lot size – selling interest was seen at the same level on the follow in normal clip sizes. On Brazil urea futures, the Nov/Dec Brazil spread traded at -5 (800 and 805), which seemed low basis last done outright levels.
