Market Commentary / Recent Trades

Singapore iron ore futures saw a modest recovery in the London morning session, having previously sustained substantial losses, at one point nearing \$6 over the course of early trading. Opening at \$91.92, futures rallied sharply on the open to \$93.55 before retreating slightly to \$92.8. From there the recovery continued to session highs of \$94.65, finishing a dollar below at \$93.65. The early sell off came on the back of poor economic forecasts throughout the Chinese economy, and steel industry in particular. Beijing extended emissions-related production limits into Q122, as official data indicated steel production fell to its lowest level since 2017 this September.
