Synopsis - Intraday

- Price is above the 8—21 period EMA's
- RSI is above 50 (62)
- Stochastic is overbought
- Price is above the daily pivot point USD 74.98
- Price held the 200-period MA yesterday resulting in the futures trading higher, price is above the 8-21 period EMA's supported by the RSI above 50
- Downside moves that hold at or above USD 74.35 will support a bull argument, below this level the intraday technical is neutral/bullish
- The RSI has made a higher high, however we can see a 5-wave pattern higher (marked with the black line) that is warning we have the potential to enter a corrective phase soon
- Technically bullish the 5-wave pattern is warning that we could correct from here; however, if we base around the USD 73.62 area in a 3-wave pattern then we have the potential to enter another intraday bull cycle.
