## China Looking to Speed Up Lithium Mining—Open Gov Asia

As global demand for lithium soars with no signs of abating amid a global shift to battery-powered vehicles to reduce carbon emissions, the acceleration of lithium mining and extraction in China has been pushed by industry representatives at the annual Two Sessions policy-setting gatherings in Beijing.

With the current supply of lithium still tight, the exploration and development of domestic lithium resources should be stepped up to ensure the safety of the supply chain, said Zeng Yuqun, Member, 13th National Committee of the Chinese People's Political Consultative Conference.
