Fertilizer Derivatives End of Day Report

NOLA UREA

Quiet day back into the markets after the long holiday weekend. Weather still not cooperating in the Midwest from what we've been hearing. Overall, quiet day to start back in the US market. Very little happening on physical barges as well - not much reaction to the CF news that came out last Thursday (i.e. regarding the UP shipments) as maybe the trade suspected.

INTL UREA FUTURES

Europe still on holiday, not much happening in the INTL futures markets today. India yet to tender which is what some are looking for before making their next moves on futures.
