## Fertilizer Derivatives End of Day Report

### NOLA UREA

The urea market in NOLA went quiet today, trading only 500 tons in futures for August at \$650. In the physical market in NOLA it was quiet as well with only one barge reported at \$635. Very little to report on as we wait until next week before we see an emergence of spot demand. It is worth noting that prices were slightly firmer it seemed like with less sell pressure on futures.

### INTL UREA FUTURES

Nothing trading. Everyone's eyes are on the Indian Tender.
