Fertilizer Derivatives End of Day Report

FUTURES MARKET COMMENTARY

The futures market continues to remain very quiet in the NOLA market, with no cleared trades at the time this was reported. In the International futures market there was another Q3 EGYPT futures trade at \$750 which is in line with where it traded yesterday as well. Farmers are planting in the US, traders are in hopes that they come back for resupply in the top dress season sometime in the next couple of weeks. Overall, very quiet day.
