

Fertilizer Derivatives End of Day Report

FUTURES MARKET COMMENTARY

NOLA UREA & UAN

No Futures trades occurred in NOLA Urea or UAN markets today on CME. There was some light interest in the morning, but nothing was transacted. There was a futures transaction in the DAP market with Q4 DAP trading at 740. The attitude of the market seemed tired with a lot of traders wanting to enjoy their weekend and come back and tackle the markets Monday.

INTL UREA

Very slow day in the international markets no INTL futures contracts were traded on CME today. Traders decided to sit on the side lines going into the weekend.
