Market Commentary / Recent Trades

Iron ore edged up and returned to near \$110 level on the back of yesterday's news of more steel mills planning to lift production this month. A market source said another seven mills would resume operation on top of the ten mills raising production this week. As a result, the average blast furnace rates ticked up this week. According to a Mysteel survey of over 247 Chinese steel mills, the blast furnace operation rate was up 1.09% w-o-w to 72.7%. Capacity utilisation rates also halted the decline first time since the end of June, slightly up 0.3% w-o-w to 79.6% from 29 July – 4 Aug. Elsewhere, the Shanghai branch of the People's Bank of China released fiscal plans to boost economic recovery in an H2 conference. This cited more efforts to be made on financial risk monitoring and steady loan growth for enterprises in the second half, along with more funding support to real estate developers.
