Market Commentary / Recent Trades

Iron ore futures retreated today and gave up most of yesterday's gains. Chinese steel mills seemed less pessimistic about demand in Sept along with small recovery in margins, output continued to grow since the beginning of Aug. The China Iron Ore & Steel Association (CISA) estimated the daily crude steel output among the surveyed mills rose 2.7%, or 53,000 tonnes to around 2 million tonnes per day over 11-20 Aug. Meanwhile, both rebar and HRC inventories were on the decline for the fourth consecutive week. SMM data showed today that rebar stocks at major Chinese steel mills dropped to 6.75 million tonnes, down 2.3% w-o-w, while HRC inventories edged down 5.7% to 2.56 million tonnes for the week ending 25 August. In the spot market today, rebar and HRC made further gains in price although sales have again come down.
