Market Commentary / Recent Trades

Iron ore prices rose towards \$110 with firm buying activities observed in both seaborne and portside markets. Elsewhere, due to slow recovery in domestic demand, China's steel exports in May hit the highest level since 2016, increasing the total exports by 41% to 36.4 million tonnes for the first five month this year, as revealed by data released by the General Administration of Customs today. Accordingly, iron ore import volume increased by 4% to 96.18 million tonnes in May, while total volume for the first 5M sped up 7.7% compared with the same period last year and stood at 480.75 million tonnes. In the futures market, Jul moved within a dollar with most of the trades at \$107.7 and closed at \$107.85; Aug and Sept ticked up to \$105.5 and \$102.9 respectively. Large size traded on Jul/Aug at \$2.35, Jul/Sept at \$4.5.
