

Fertilizer Derivatives End of Day Report

FUTURES MARKET COMMENTARY

NOLA

NOLA saw a little activity today. DEC future traded at 385, it was the only trade on CME as I am writing this. Most of the trade is waiting for a new Indian tender to be announced as RCF closed there latest this week.

INTL

The market was quiet today in futures nothing traded on international on CME today. Traders seemed content to sit on the sidelines going into the weekend as they wait for news on a possible new Indian tender either this weekend or early next week.
