21 October 2024

The Monday afternoon saw a session of two halves. The first half was relatively stagnant trading in around \$102.00, before falling off two dollars to a daily low and then closing at \$100.10.

We saw Dec trading in multiple clips through the session, as we head towards the end of the month, but there weren't significant outright trades.

Spreads to begin with maintained strength as Nov/Dec was paid par in 35kt. However, with the decline in flat price, we saw spreads come under pressure. This enabled Nov/Q1 to trade -\$0.05 in 120/40kt and subsequently Dec/Mar \$0.05.
