

02 February 2026

Capesize Commentary		Panamax Commentary	
Capes opened lower today against the backdrop of macro volatility as commodities across the board all took a hammering in overnight trading. Feb was sold at \$25,250 down to a low of \$24,750. March was sold at \$29,000 (-\$500), ultimately getting sold down to \$27,650 in size. Q2 was sold at \$29,250 and \$29,000. The evening session thinned out early on, but bid support was evident, with the prompts ticking up post index (-\$668), with Feb paid back up to \$25,100 and March at \$28,250. Q2 went \$29,100 bid and Q4 was paid at \$29,650. Have a very good evening.		Panamax opened lower today against the backdrop of both the Capes dropping and macro volatility, as commodities across the board all continued to drop off following last week. Feb was sold initially at \$16,000 and then down to a low of \$15,250. March was sold at \$17,600, ultimately getting sold down to \$17,250. Q2 was sold down to \$17,500. The evening session thinned out early on, however, a little bit of bid support was apparent as we finished the day with support just above the day's lows.
